

[Preface](#) ..... b

## Book 1: Engineering Properties

[Chapter 1. About Performance Pipe](#) ..... 1

**The Polyethylene Pipe Advantage**..... 1

**Identification Stripes and Colors**..... 2

Colors to identify applications:..... 2

Color stripe patterns to identify sizing systems:..... 2

Color stripes to identify DR:..... 2

Solid Colors ..... 3

**Handling** ..... 3

**Flexibility and Toughness**..... 3

**Pressure Rating** ..... 4

**Service Temperatures** ..... 4

**Non-contaminating** ..... 4

**Outstanding Chemical Resistance**..... 4

**Sealed Joints**..... 4

**Excellent Hydraulics**..... 5

**Surge and Liquid Velocity**..... 5

**Abrasion Resistance** ..... 5

**Thermal Expansion**..... 6

**Additional Information**..... 6

[Chapter 2. Performance Pipe Products](#) ..... 7

**Piping Constructions**..... 7

**Sizing Systems** ..... 7

**Third Party Certification and Listing** ..... 7

Table 2-1 Performance Pipe DriscoPlex™ Piping Products ..... 8

Table 2-2 Markets and Typical Applications and Uses for Performance Pipe  
M & I Piping Products ..... 10

|  |           |
|--|-----------|
| <b><u>Chapter 3. Polyethylene Material Fundamentals</u></b> .....                      | <b>11</b> |
| <b>Polymerization</b> .....  | <b>11</b> |
| <b>Fundamental Characteristics</b> .....   | <b>11</b> |
| Figure 3-1 Branched Polyethylene Molecule .....  | 11        |
| <b>Crystallinity (Density)</b> .....   | <b>12</b> |
| Figure 3-2 Crystalline and Amorphous Structure.....                                    | 12        |
| <b>Pigmentation Effects on Density</b> .....   | <b>12</b> |
| <b>Molecular Weight</b> .....  | <b>13</b> |
| <b>Molecular Weight Distribution</b> .....   | <b>13</b> |
| Figure 3-3 Molecular Weight Distribution and Modality .....                            | 13        |
| <b>Understanding Property-Characteristic Interrelationships</b> .....                  | <b>14</b> |
| <b>A Discussion of Table 3-1</b> .....   | <b>14</b> |
| Table 3-1 Physical Property Changes due to Fundamental Characteristic<br>Changes ..... | 15        |
| <b>Graphical Illustrations of Interrelationships</b> .....                             | <b>15</b> |
| <b>Stiffness</b> .....   | <b>16</b> |
| Figure 3-4 Stiffness .....   | 16        |
| <b>Tensile Strength, Impact &amp; Melt Viscosity</b> .....                             | <b>16</b> |
| Figure 3-5 Yield Strength.....   | 16        |
| Figure 3-6 Tensile Strength vs. Molecular Orientation .....                            | 17        |
| Figure 3-7 Property Change vs. Molecular Weight.....                                   | 17        |
| <b>Tensile Elongation</b> .....  | <b>18</b> |
| Figure 3-8 Tensile Elongation vs. Pulling Speed .....                                  | 18        |
| <b>Resistance to Slow Crack Growth</b> .....   | <b>18</b> |
| Figure 3-9 Resistance to Slow Crack Growth.....  | 18        |
| <b>Permeation</b> .....  | <b>19</b> |
| Figure 3-10 Resistance to Permeation .....   | 19        |
| <b>Hardness</b> .....  | <b>19</b> |
| Figure 3-11 Hardness.....  | 19        |

|  |           |
|--|-----------|
| <b><u>Chapter 4. Polyethylene Material Standards</u></b> .....             | <b>20</b> |
| Cell Classification Number .....   | 20        |
| Long Term Strength .....   | 20        |
| Table 4-1 ASTM D 3350 Properties and Cell Classification Limits .....      | 21        |
| Material Designation Code .....  | 22        |
| Performance Pipe Materials .....   | 23        |
| <b><u>Chapter 5. Environmental Effects</u></b> .....                       | <b>24</b> |
| Resistance to Corrosion .....  | 24        |
| Resistance to Stress Cracking .....  | 24        |
| Biological Effects .....   | 24        |
| Sunlight (Ultraviolet) Effects .....                                       | 24        |
| Thermal Effects .....  | 25        |
| Chemical Effects .....   | 25        |
| Resistance to Chemical Attack .....  | 25        |
| Solvents and Surface Cleaning .....  | 26        |
| Chemical Solvation (Permeation) .....                                      | 26        |
| Chemical Attack .....  | 27        |
| Chemical Resistance Information .....                                      | 27        |
| Chemical Resistance Key for Table 5-1 .....                                | 28        |
| Table 5-1 Chemical Resistance .....  | 28        |
| <b><u>Chapter 6. Organizations, Standards &amp; Publications</u></b> ..... | <b>35</b> |
| Organizations .....  | 35        |
| Standards .....  | 35        |
| Other Publications .....   | 37        |

## **Book 2: System Design**

|   |           |
|---|-----------|
| <b><u>Chapter 1. Introduction</u></b> .....                                       | <b>38</b> |
| DriscoPlex™ Outside Diameter (OD) Controlled<br>Polyethylene Pipe .....           | 38        |
| DriscoPlex™ 2000 SPIROLITE® Inside Diameter Controlled Polyethylene<br>Pipe ..... | 39        |

|  |           |
|--|-----------|
| <b><u>Chapter 2. Stress Rated Materials</u></b> .....                                    | <b>40</b> |
| <b>Table 2-1 Hydrostatic Design Basis Ratings<br/>    and Service Temperatures</b> ..... | <b>40</b> |
| <b><u>Chapter 3. Pressure Rating Design</u></b> .....                                    | <b>41</b> |
| Pipe Pressure Ratings .....  | 41        |
| Table 3-1 Environmental Design Factors, $f_E$ .....                                      | 42        |
| Table 3-2 Service Temperature Design Factors, $f_T$ .....                                | 42        |
| Fitting Pressure Ratings .....   | 42        |
| <b><u>Chapter 4. Fluid Flow</u></b> .....  |           |
| <b>Application Limitations</b> .....   | <b>43</b> |
| <b>Frozen Pipes</b> .....  | <b>43</b> |
| <b>Pipe Internal Diameter</b> .....  | <b>43</b> |
| <b>Pressure Flow of Liquids</b> .....  | <b>44</b> |
| <b>Darcy-Weisbach/Colebrook/Moody</b> .....  | <b>44</b> |
| Table 4-1 Absolute Roughness for Commercial Pipe Materials .....                         | 46        |
| Figure 4-1 Moody Diagram .....   | 46        |
| <b>Fitting and Valve Friction Losses</b> .....   | <b>46</b> |
| Table Fitting Coefficient $K'$ .....   | 47        |
| <b>Hazen-Williams</b> .....  | <b>47</b> |
