

# Hot Tap

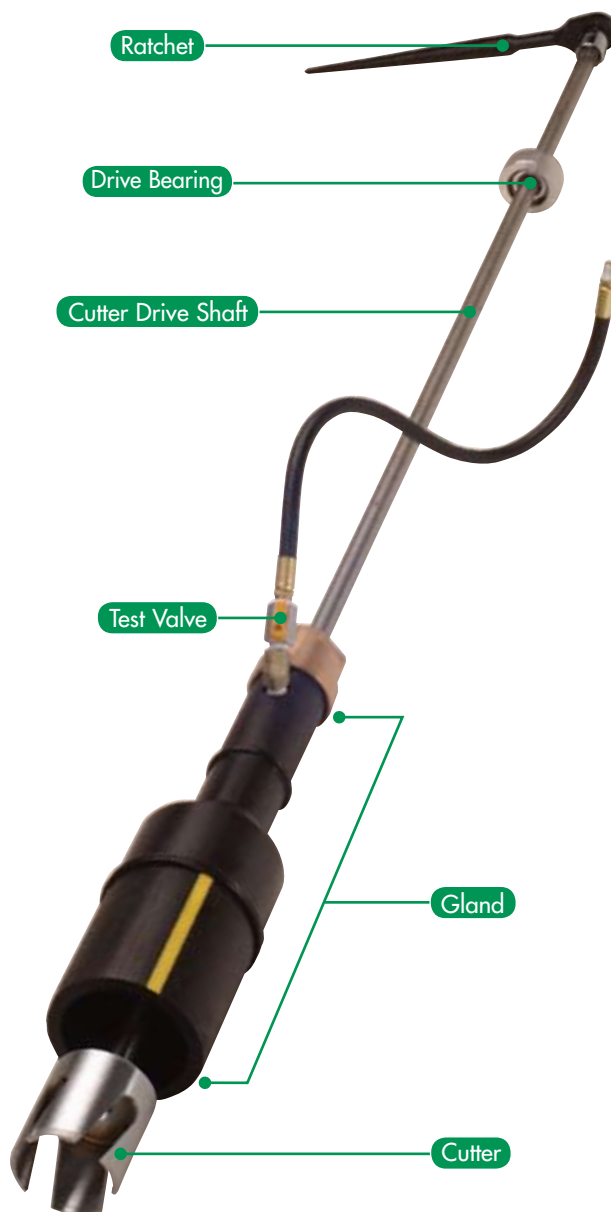

## Tool Tapping Capability for 2" IPS – 6" IPS Branch Saddles

### Hot Tap Tool

The McElroy Hot Tap Tool is the most precise and economical way to tap through **2", 3", 4", or 6" branch saddles**. This tool can be used with the No.2LC, No.2CU, PitBull® No.14, or the No.28CU fusion machines in combination with the Sidewinder™. The gland is customized to meet the user's material of choice, eliminating the need for material compatibility fusion in the field.

Main line contamination is eliminated by containing continuous chips in the cutter, ahead of the coupon, then retracting them out of the main. Tool components are butt fused together, eliminating the need for safety chains. The gland fitting of the tool includes a packing seal for safety, ensuring no leakage around the cutter drive shaft, and a test valve. The McElroy Hot Tap Tool is long enough to meet or exceed ASTM standards for squeeze off dimensions or it can be used with a ball valve.

| Part No. | Description |
|----------|-------------|
|----------|-------------|

#### 2" Hot Tap Tool

|  |                                   |
|--|-----------------------------------|
| Package: Tool, ratchet wrench, storage case. |                                   |
| 220002                                       | 2" Hot Tap (Medium Density 2406)  |
| 220003                                       | 2" Hot Tap (High Density 3408)    |
| 220006                                       | 2" Hot Tap (DRISCOPIPE-8100)      |
| 221501                                       | Spare Cutter 1.5" OD x 1.75" Long |

#### 3" Hot Tap Tool

|  |                                    |
|--|------------------------------------|
| Package: Tool, ratchet wrench, storage case. |                                    |
| 220106                                       | 3" Hot Tap (Medium Density 2406)   |
| 220107                                       | 3" Hot Tap (High Density 3408)     |
| 220109                                       | 3" Hot Tap (DRISCOPIPE-8100)       |
| 221601                                       | Spare Cutter 2.25" OD x 2.25" Long |

#### 4" Hot Tap Tool

|  |                                  |
|--|----------------------------------|
| Package: Tool, ratchet wrench, storage case. |                                  |
| 220206                                       | 4" Hot Tap (Medium Density 2406) |
| 220207                                       | 4" Hot Tap (High Density 3408)   |
| 220209                                       | 4" Hot Tap (DRISCOPIPE-8100)     |
| 221702                                       | Spare Cutter 3" OD x 2.75" Long  |

#### 6" Hot Tap Tool

|  |                                    |
|--|------------------------------------|
| Package: Tool, ratchet wrench, storage case. |                                    |
| 220302                                       | 6" Hot Tap (Medium Density 2406)   |
| 220303                                       | 6" Hot Tap (High Density 3408)     |
| 220306                                       | 6" Hot Tap (DRISCOPIPE-8100)       |
| 221902                                       | Spare Cutter 4.44" OD x 3.25" Long |

#### 6" Polyvalve Conversion Kit

|  |                           |
|--|---------------------------|
| Converts a standard 6" Hot Tapping Tool to a 6" Polyvalve Hot Tap Tool. Kit includes 3" OD cutter. |                           |
| 220305   | 6" Hot Tap Conversion Kit |
