

McElroy Low Profile Rollers

Pipe-Handling Equipment for 4" - 20" OD pipe (100mm - 500mm)

Overview

McElroy's Low Profile Rollers are a modular pipe roller designed to make pulling 4" - 20" (100mm - 500mm) diameter thermoplastic pipe easier and to minimize drag on the pipe. Perfectly paired with other McElroy productivity-enhancing tools, such as the PolyHorse, the new rollers are tip-resistant, allow for curved pulls of pipe over considerable distances, and provide no resistance to external fusion joint beads moving across the roller. The Low Profile Rollers can be ordered from McElroy's worldwide network of distributors and are packaged in a "nested" crate that contains 40 complete roller assemblies.

Features

- Minimizes drag on the pipe
- Allows for curved pulls
- Rolls easy, increasing productivity
- Keeps pipe clean and off the ground
- Sealed ball-bearing construction
- Compact storage
- Won't tip over
- Minimizes pipe damage
- Modular design

Specifications

- 40 complete rollers per case

Part No. A1867501
