

FRIAFIT®-Coupler AM

for jointing HDPE pipes SDR 17–33 for water and sewage pipe lines

PE 100

Maximum working pressure 10 bar

d	Order-Ref.	Stock-status	VE	PE	D	L	t	Weight kg/each
110	T-680 001	1	24	192	130	160	80	0.600

FRIAFIT®-Coupler AM.

FRIAFIT®-Coupler AM

for jointing HDPE pipes SDR 17–33 for water and sewage pipe lines

PE 100

Maximum working pressure 10 bar

Areas of Application

The FRIAFIT®-Coupler AM joins HDPE pipes leakproof and longitudinally strong.

Additional applications:

- Integration of adapters into existing pipe system
- Reinforcement/sealing of local pipe damage.

Assembly Instructions

Fusion of pipe ends with FRIAFIT®-Coupler AM takes place using FRIAFIT® fusion – leakproof and longitudinally strong.

The HDPE pipe ends are prepared according to the general installation requirements (see also “Fitting Instructions” for the FRIAFIT®-Sewage System). This involves removing the oxide layer and cleaning the pipe ends.

To compensate a larger annular gap (> 1 mm, max. 3 mm) between coupler and pipe, the pre-heating barcode can be used from d 560 (see instructions packed up with the coupler).

Nine good reasons for using the FRIAFIT®-Coupler AM

- Large coupler depth for ease of pipe guiding (no holding clamps required)
- Ensures leakproof, longitudinally strong and root-bound connections
- Exposed, tightly embedded heating coil for direct heat transmission to the pipe
- Extra wide fusion zones, extra long insertion depths
- Short fusion times, short cooling times
- Cold zones at the front side and in the middle of the coupler
- Slide-over coupler without center stop
- No coupler extension during fusion due to the outer armouring wire.
- Barcode for fully automatic fusion with HDPE pipes from SDR 33 to SDR 11 having regard to the ambient temperature (temperature compensation).
